

**The new XM-5000 3D Toy VRA System is a big hit!**

**Infra-Red control signals-no interference issues!**

**User control over LED light patterns, sounds, and dual-motions**

## IMPROVEMENTS

### INTERCHANGEABLE TOY KIT (MAGNETIC CONNECTORS)

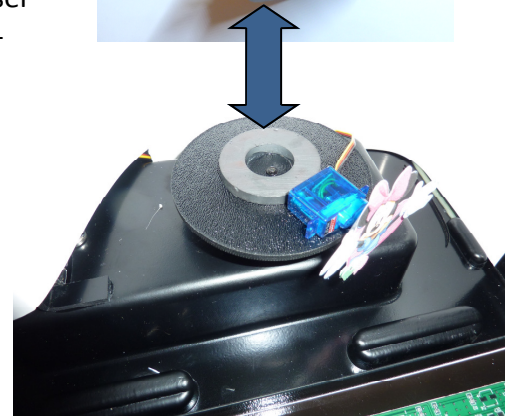

Currently Available Toys\*

All new production will incorporate magnetic connectors on each toy and the mounting base inside the unit to change toy figures easily.

To meet customer demands for toy preferences the new interchangeable toy kit will allow the user to select their favorite toy from all the toys available and change them at will quickly and easily.

Order Item # (TOY-022) \$89

### INSTALLATION KIT

#### CORNER MOUNTING BRACKETS

The XM-5000 installation kit (INS KIT-2) includes two corner mounting brackets that mount easily to booth walls with key-hole slots. The kit also includes 2 power extension cables, 25' IR extension cable, mounting ties and adhesive bases for quick installation of the system.

### NEW POWER SUPPLIES

All future production will be supplied with new style power supplies with 6 foot long cords and standard design. Can be used with Y-cord to power both systems in cases where power outlets are scarce in a sound booth.
